The Utility agrees to sell and deliver water to the Customer and the Customer agrees to purchase and receive water from the Utility in accordance with the rules and regulations of the Utility as included in its approved Tariff on file with the Utility and the Public Utility Commission.

All water will be measured by meters which are furnished, installed, owned and maintained by the Utility. The meter and/or connection is for the sole use of the Customer to serve water to one dwelling, business, property. The Customer shall not share, resell, or submeter water to any other dwelling, business, property, etc., without the specific written authorization of the Utility and in compliance with applicable laws and regulations.

The Utility has the right to locate a water service meter and the pipe necessary to connect the meter on the property of the Customer at a point mutually agreeable to both the Utility and the Customer. The Customer will allow the Utility access at all reasonable times to its property and equipment located upon Customer's premises for the limited purposes of reading the water meter, repairing or replacing existing facilities and the inspection of Customer's facilities to check for illegal connections or unsafe plumbing practices or cross-connections, in compliance with the requirements of the Texas Commission on Environmental Quality's "Rules and Regulations for Public Water Systems."

The Customer will install, at his own expense, a service line from the water meter to the point of use which includes a cutoff valve on the Customer's side of the water meter. The Customer will be responsible for maintenance and repair of the service line. The Customer shall hold the Utility harmless from any and all claims or demands for damage to real or personal property occurring from the point the Customer ties on the water meter to the final destination of the line installed by Customer. The following are unacceptable practices which are prohibited by State regulations: A) No direct connection between the public drinking water supply and a potential source of contamination. Potential sources of contamination shall be isolated from public water system by an air-gap or an appropriate backflow prevention device; B) No cross-connection between the public drinking water supply and a private water system; C) No connection which allows water to be returned to the public drink water supply is permitted; D) No pipe or pipe fitting which contains more than 0.25% lead or solders and flux that contain more than 0.2% lead can be used for any plumbing installation or repair of any residential or non-residential connection which provides water for human consumption and connected to the water supply.

The Customer agrees to grant to the Utility an easement/right of way for the purpose of installing, maintaining and operating such pipelines, meters, valves, and any other equipment which may be deemed necessary for the provision of Utility service to that Customer. The Utility will attempt to restore the Customer's property to its original condition after installation or repairs. This easement may be in such form as is required by the Utility. The Customer agrees not to interfere with the Utility's employees in the discharge of their duties. The Customer will not permit anyone except the Utility's employees to tamper with or interfere with any of the equipment installed on the Customer's premises.

The applicant has been shown a copy of the Utility's **Public Utility Commission** Approved Tariff and agrees to pay the rates in the tariff and abide by the requirements in the application.
